# Partnering for Peace in Israel & Palestine

As heightened violence grips Israel and Palestine, vastly different experiences and perspectives make conversations to support an end to the bloodshed charged and difficult. In a reality marked by despair, polarization, and dehumanization, Combatants for Peace (CfP) provides a model for hope, humanity, and another way.

CfP is an organization built by former combatants who laid down their weapons and joined forces to nonviolently resist the occupation and co-create a future of peace and collective liberation.

Join Combatants for Peace's activists as they share their powerful stories of transformation and joint work for dignity, justice, and liberty for all.
